

Botox & Other Neuromodulators Post-Treatment Instructions

- Do NOT manipulate the treated area for 3 hours following treatment. Do NOT receive facial/ laser treatments or microdermabrasion after Botox injections for at least 10 days. Ask your provider if you are not sure about the time frame of certain services.
- Do NOT lie down for 4 hours after your Botox treatment. This will prevent the Botox from tracking into the orbit of your eye and causing drooping eyelid.
- It can take approximately 4 to 14 days for results to be seen. If the desired result is not seen after 2 weeks of your treatment you may need additional Botox. You are charged for the amount of product used. Therefore, you will be charged for a product used during any touch-up or subsequent appointments.
- Do NOT perform activities involving straining, heavy lifting, or vigorous exercise for 6 hours after treatment. This will keep the Botox in the injected area and not elsewhere.
